Prof. Dr. Alexander Ferrein,

Prof. Dipl.-Inf. Ingrid Scholl

Erklärung

Hiermit versichere ich, dass ich die vorliegende Arbeit selbständig verfaßt und keine anderen als die angegebenen Quellen und Hilfsmittel benutzt habe, dass alle Stellen der Arbeit, die wörtlich oder sinngemäß aus anderen Quellen übernommen wurden, als solche kenntlich gemacht sind und dass die Arbeit in gleicher oder ähnlicher Form noch keiner Prüfungsbehörde vorgelegt wurde.

Aachen, den 14. September 2017

Vorname Name

At first I wanted to open my thesis with an useful definition for *artificial intelligence*, but since the term is misleading and debatable I couldn't really define what *artificial intelligence* is. Then again I realized how we utilize the term *intelligence* for this matter:

The moment we fully understand and can describe an seemingly intelligent behavior by an artificial entity with an algorithm, we wouldn't call it intelligent any longer.

Contents

1	Introduction	1
1.1	General Introduction to this Thesis' Topic	2
1.2	Short Overview about the Motivation and Challenge of the Thesis . . .	3
1.3	Short Explanation of the Approach	4
1.4	Overview about Each Chapter of the Thesis	4
2	Related Works	7
2.1	Which Related Works Exists in Known Literature?	7
2.1.1	Segmentation with the Help of Ground Truth Information	8
2.1.2	Other Related Works with Different Methods or Objectives . . .	9
2.1.3	Further Related Works:	12
2.2	Wherein Differs the Approach of the Thesis from State of the Art? . . .	13
3	Mathematical/Technical Background	17
3.1	Used Models	17
3.1.1	Tensor	17
3.1.2	Artificial Neural Network	18
3.1.3	Convolution	27
3.1.4	Deconvolution	35
3.2	Unwanted Effects in Neural Networks	37
3.2.1	Overfitting	37
3.2.2	Vanishing Gradient Problem	40
3.2.3	Exploding Gradient Problem	41
3.3	Which Mathematical Methods are Known in Literature?	43
3.3.1	The Neuron	43
3.3.2	Forwardpropagation	44
3.3.3	Backpropagation	46
3.3.4	SGD	50
3.3.5	Convolution	51
4	Approach	59
4.0.6	Prerequisites	59
4.1	Description of the Own Approach	60
4.1.1	Object Detection	60
4.1.2	Object Localization	64
4.2	Object Tracking	69

5	Experimental Results	75
5.1	Which Criteria for Evaluation of the Approach Exists?	75
5.2	Which Experiments were carried out?	75
5.3	Which Data were Gained? Are those Data and Experiments Significant?	77
5.4	Statistical Evaluation	80
5.5	Detail of Implementation	83
6	Further Analysis	89
6.1	Future Works	89
6.2	Summary and Conclusion	90
	Literature	93

List of Figures

1.1	[SLJ+14, Page 3, Fig. 1.]	1
2.1	[Zha16, Page 6, Fig. 3.]	10
2.2	Network flow	10
2.3	Network flow with PG	11
2.4	R-CNN caption boxes	11
2.5	[chr17]	12
2.6	[Page 3, Fig.1. YPW+07]	12
3.1	Perceptron-Network	19
3.2	illustration logistic regression	19
3.3	Feed Forward Network with one Hidden Layer	20
3.4	curved separation	20
3.5	topological distortion of the domain space	21
3.6	cutout of t-SNE visualizations of word embeddings. from [TRB10]	22
3.8	recognized features captured at different layers, from [ZF13]	24
3.10	transfer functions	25
3.11	df/dx of transfer functions	25
3.12	simple CNN, from [LKF10]	27
3.13	one convolutional unit over a certain path of input pixels	28
3.14	convolutional layer, from [Ola14a]	28
3.16	processed dataset	29
3.17	local optimum	31
3.18	Example sentences generated by multimodal RNN [KF15, Page 7, Fig. 6.]	32
3.19	unlikely events for a Neural Network. from [GDDM13, Page 26, Fig. 6.]	32
3.21	model AlexNet [KSH12, Page 2, Fig. 2.]	33
3.22	inception modules [SLJ+14, Page 5, Fig. 2.]	35
3.24	overfitting	38
3.25	vanishing gradient problem	40
3.23	inference pattern (checker board artifact)	42
3.26	a single neuron	43
3.27	SGD illustration	51
3.28	(3.28a source <i>CIFAR-10 dataset</i>)	53
3.29	convolution on multiple batches	55
4.1	residual network of the thesis approach	60
4.2	Residual learning: a building block, from [HZRS15]	61
4.3	ResNet, from [HZRS15]	62
4.5	ResNet training curves (18 and 34 layers), from [HZRS15, Page 5, Fig. 4.]	63
4.6	image decompression pattern through deconvolution	66
4.7	convolutional network with appended deconvolutional network,	67

4.9	object localization with option 1	67
4.11	object localization with option 2	68
4.13	object localization with option 3	69
4.14	processing of the image “pyramid”	70
4.15	inference signal filter	71
4.16	image fragmentation	72
5.1	object localization with option 2	78
5.3	Cat or no-Cat Net	79
5.5	Cat or no-Cat Net zoomed	80
5.7	original cat image zoomed for comparison	80
